COST ACTION IS1305 European Network of e-Lexicography

WG3 Innovative e-dictionaries: Work plan 2015-2017

Working Group 3 (WG3) has 129 members from 27 different countries.

Background

The original proposal for COST Action IS1305 specifies a number of topics that will be dealt with within the Action in Working Group 3. These are:

- Description of the workflow for corpus-based lexicography (Bolzano July 2014)
- Overview of existing software needed in this workflow (Vienna, February 2015)
- Dictionary Writing Systems (and Corpus Query Systems) (Vienna, February 2015)
- Analysis of the possible impact of automatic acquisition of lexical data (distributional thesauri etc.) (Herstmonceux, August 2015)
- Analysis of the interface between dictionaries and computational lexica (cf. wordnets) and syntactically and semantically annotated corpora (Framenet, Semcor, Senseval) (Spring 2016)
- Investigation of possible use of dictionary content for computational linguistic applications (Autumn 2016)

The meetings of WG3 have been (and will be) organised around these topics, each meeting dealing with one theme/topic. For each meeting one or two key persons are identified who are responsible for the organisation of the meeting. Surveys have been used and will be used to gather information from WG3 members on the different topics.

Future meetings

Brno, 2016: **Lexicographical data meet computational linguistics and knowledge systems** (Ilan Kernerman and Egon Stemle)

This meeting will be held in Brno in conjunction with Text, Speech and Dialog conference, September 12-16 (http://www.tsdconference.org/tsd2016/). Local organisers are: Adam RAMBOUSEK and Aleš HORAK.

Proposed programme: to be discussed at WG3 meeting April 1st 2016

Spring 2017: **Between Corpora and Dictionaries** (Simon Krek, Igor Leturia)

Proposed programme to be ready by September 2016

Autumn 2017: **Topic to be defined.**

Possible suggestions: Design issues, linking, ...

Proposed programme to be ready by March/April 2017

WG3 Training school

Dates: 17th – 20th May 2016 (pre-LREC 2016 in Portorož, Slovenia)
Location: Ljubljana, Slovenia (University of Ljubljana)
Title: Tools and methods for creating innovative e-dictionaries
Program: http://www.elexicography.eu/events/training-schools/ljubljana-2016/
Instructors/teachers:

- Egon Stemle – EURAC, Italy
- Miloš Jakubiček – LCL, Czech Republic
- Simon Krek & Iztok Kosem – University of Ljubljana, Slovenia
- Carole Tiberius – Institute for Dutch Lexicology, the Netherlands
- Michal Boleslav Měchura – Dublin City University and Foras na Gaeilge, Ireland

Participants (confirmed by Management Committee): 30 (22 reimbursed)

Joint workshop with Parseme COST action

Dates: 5/6 April 2016
Location: Skopje (FYR of Macedonia)
Workshop page on the Parseme web site and details of the workshop programme:
http://typo.uni-konstanz.de/parseme/index.php/events/2-general/135-enel-parseme-workshop-on-mwe-lexicons
Participants from ENeL: 14 (12 reimbursed)

ELEXIS (European Lexicographic Infrastructure) proposal (ENeL all)

- Types of action: RIA Research and Innovation action
- Deadline Model: two-stage
- 1st stage Deadline: 30 March 2016
- 2nd stage Deadline: 29 March 2017
- Work Programme Part: European Research Infrastructures (including e-Infrastructures)
- Duration: 4 years
- Budget: 5M EUR
- Results: 3 months (1st stage)

Consortium: 14 partners, leading: »Jožef Stefan« Institute, Ljubljana, Slovenia
