

Host Report Short Term Scientific Mission IS1305-20655

COST STSM Reference Number: COST-STSM-IS1305-20655
Period: 2014-08-18 00:00:00 to 2014-08-22 00:00:00
COST Action: IS1305
STSM type: Regular (from Netherlands to Belgium)
Guest/STSM applicant: Dr Carole Tiberius , INL, Leiden, The Netherlands
Host: Prof dr Frieda Steurs KU Leuven Campus Antwerp Frieda.Steurs@kuleuven.be
Duration: 5 working days : from 18th of August 2014 till the 22nd of August 2014.

The Scientific mission had a clear goal : to improve an existing Dutch database on linguistic terminology. The Taalportaal termbase is based on existing resources, i.e. GOLD ontology (2010), glossary of Geert Booij (2010) and glossary of Hans Broekhuis (2013).

The applicant studied the different rules on the creation of terminology databases, and especially the requirements when creating definitions.

The database was also compared to the datamodels used in i-term, in order to come to a better structure of the existing database.

The applicant also got familiar with different types of software for terminology management, and the TBX-exchange standard.

The result of this scientific mission will be a.o. an optimization of the existing database with linguistic terms, possibly a publication, and continuing research on terminology databases.
