### Report:

Within his STSM at the Research Institute for Linguistics, Hindrik Sijens, as a member of ENeL Working Group 1, created successfully an inventory of online dictionaries. He set up 17 different features and categories to describe these portals. His valuable work will be essential help for the Working Group 1 as its main goal to set up a European dictionary portal and establish a database of scholarly (online) dictionaries. At the moment the inventory contains 58 dictionary portals.

On the 11th of June Hindrik Sijens held a presentation in our institute about his research (title: *The World of Dictionary Portals*) and he gave us an introduction of the Frisian lexicography also.

He will present the result of his STSM at the next ENeL meeting in Herstmonceux Castle in 14th of August 2015.
